Introduction to Music Theory

This course begins by giving you an insight into where octaves come from. You will learn that musical notes, like all sounds, are made of evenly-spaced sound waves. You will study high and low frequencies, and learn that people have been making music and talking about music long before we knew that sounds were waves with frequencies. You will also learn that any note that is twice the frequency of another note is one octave higher.

Introduction to Basic Electrical Drawings and Test Equipment

Installing a safe electrical system begins with a well-planned electrical drawing. Construction projects require work drawings and specifications to guide electricians in installing electrical equipment. Besides being a customer requirement, these plans and drawings provide specific instruction to electricians. Standard symbols and lines are used to represent the different types of material, raceways, conduits, and circuit connections.
